INTRODUCING XpGENERATOR® ARCHIVE

Save Time, Save Money, and Minimize Regulatory Compliance Risk

XpGenerator® is designed to automate the website archival process ensuring quick, consistent, and painless regulatory compliance.

A CHALLENGE AS OLD AS THE INDUSTRY

Companies in regulated industries such as Financial Services, Insurance and Utilities should archive their websites. *Depending on the industry, this is either a best practice or a regulatory requirement and it is typically performed manually, utilizing in-house resources or external contract services.*

CHANGING THE GAME

Simple and automated with a high ROI: *Embedded in your AEM instance, XpGenerator® automatically performs full and incremental archiving, rendering comprehensive site content as PDFs and storing them in a location of your choice, complete with cover pages and notations. This simple, hands-off solution ensures that even incremental updates to your websites are recorded, organized and accessible – and it can be deployed in hours, not weeks.*

XPGENERATOR® ARCHIVE SOLUTION VALUE

FUNCTIONALITY

Automate processes to perform full or incremental archiving without intervention.

Set up cover pages, add notes to pages as required, and always have your website recorded.

CONTENT ORGANIZATION

Store the generated PDFs to any location of your choice – hard drive, cloud storage or even your DAM.

Have them readily accessible to any requesting regulatory agency or internal auditor.

WITH XPGENERATOR®		WITHOUT XPGENERATOR®
Reduce PDF creation time by up to 98%	✓	Laborious, costly and manual archival process
Reduce compliance risk	✓	Risk exposure due to human error
Consistent and automated archiving	✓	Likely archive lapses

KEY FUNCTIONS & FEATURES

- Security administration
- Metadata synchronization
- Customizable coversheets
- Integrate & align to your process
- Web, mobile & iPad renditions generated
- Add Java Script to get custom content
